Long-lasting to keep your decking looking great for years!

Allied Flo-Coat® Galvanized Steel Deck Framework ... the strong alternative to wood

Allied has been pioneering fence framework and related products for over half a century. Now you can rely on us for a new dimension in deck framework too. It's stronger, yet assembles as easily as wood, with commonly available fittings and fasteners. And it's not susceptible to the ravages of nature that destroy wood over time. It's simply a better value.

Check out these benefits:

- *Straight - No Twist, Bow, or Warping*
- *Light Weight*
- *Will not Split or Crack; Will not Swell with Moisture Changes*
- *Rot Resistant and Termite Proof*
- *Fire Resistant*
- *Screw Attachment for Strongest Construction*
- *Sizes to Match Lumber - or Customized to your Specifications*
- *Recyclable*
- *Consistent Quality*

**With all the benefits Allied Deck Framework provides
why would you use wood.**

When it's time to spec that deck, specify Allied Deck Framing Components.
